(a) routing encodings: atoms vs cluster size
textbook position, depot encoded: (n+1)²
ours: depot-fixed position, n²
ours: undirected edge, n(n+1)/2 (exact to n = 4)
80-atom cap
atoms
customers in cluster, n
(b) Track B end-to-end loss split, tier M
M01 best shot
M01 model opt.
M02 best shot
M02 model opt.
